

In the interest of holding fair and competitive events, the KSGA Board of Directors appointed a Handicap Committee and assigned the task of developing a methodology for evaluating and adjusting KSGA tournament handicaps based on KSGA tournament performance.

The following procedure for administering tournament handicaps for KSGA events has been approved by the KSGA Board of Directors:

All participants in KSGA events enter those events with their handicaps determined by the lower of their current GHIN handicap index or their revised KSGA handicap. The revised KSGA handicap is determined as follows:

Scores from individual KSGA stroke play events are maintained for the KSGA's most recent 10 tournaments. Any player who posts 3 or more net scores of par or better during those events will have their tournament handicap determined by using the two lowest gross scores averaged and adjusted from 72. Adjustments are an ongoing process and will occur prior to the next scheduled event.
